Education

Prwatech Institute, Pune
Data Analytics Certification
Oct 2023

Pes Modern College of Arts, Commerce & Science, Pune
Bachelor of Computer Science, CGPA: 8.14/10
Jul 2023
Final Grade: A

Experience

Supreme Facility Management Ltd
Data Analyst
Nov 2023

- Collect, analyze, and interpret large datasets to identify business trends and performance opportunities.
- Design and develop interactive Power BI dashboards for operational and management reporting.
- Create automated reports and data visualization solutions to improve reporting efficiency.
- Develop SQL queries to extract, transform, and analyze data from multiple data sources.
- Monitor business KPIs and generate actionable insights for management review.
- Conduct data validation and quality checks to ensure data accuracy and reliability.
- Collaborate with business stakeholders to understand reporting requirements and deliver analytical solutions.
- Perform variance analysis and trend forecasting to support strategic planning.
- Prepare executive summaries and analytical reports for leadership teams.
- Support data-driven decision-making through meaningful visualizations and performance metrics.
- Identify process improvement opportunities through analytical findings.
- Maintain and optimize reporting frameworks to enhance business visibility and operational control.

Key Achievements

- Improved reporting efficiency through dashboard automation and data standardization.
- Developed KPI dashboards that enhanced management visibility into business performance.
- Reduced manual reporting efforts by streamlining data collection and reporting processes.

-
- ❑ Delivered analytical insights that supported operational planning and resource optimization.

📁 Projects

❑ Diesel Consumption Analysis Dashboard

Tools: Power BI, Excel, SQL

- Developed an interactive dashboard to monitor fuel consumption, mileage, vehicle performance, and operational efficiency.
- Created automated KPI tracking for fuel cost per kilometer and vehicle utilization.
- Identified trends and anomalies in fuel usage through data visualization techniques.

❑ Transport Performance Analytics Dashboard

Tools: Power BI, Excel

- Built performance dashboards to monitor fleet operations and service efficiency.
- Developed KPI metrics for operational performance analysis.
- Implemented automated reporting for management reviews.

❑ HR Analytics Dashboard

Tools: Power BI, Excel

- Designed employee analytics dashboards covering attendance, attrition, workforce trends, and manpower planning.
 - Created visual reports to support HR decision-making and workforce optimization.
